STONEAGE - PATTERN IMPRINTED CONCRETE DRIVEWAYS

I cannot recommend this firm highly enough. The quality and look of my new driveway is magnificent. I considered Monoblocking but ruled it out as it eventually loosens and so cannot truly be said to be everlasting and maintenance-free. Pattern imprinted concrete is just that; and it also looks so much better.

My old drive was designed for cars which had high ground clearance. It was so steep that, had we not bought a Citroen, the top edge of the drive would often scrape the bottom of the car. I also ride a large heavy motorcycle which requires to be balanced precisely when I get on and off. I therefor faced particularly difficult technical and design problems when considering a new driveway. However, Glen and his men solved these easily. They did their work expertly and with good cheer. They stuck stricly to contract timetables and could not be beaten on price. Overall I was thrilled with the final result and would be happy to discuss their work on the telephone with anyone who, like me, was swithering about signing a contract for such an important part of one's living space.

It was a breath of fresh air to deal with experts in their field. I wish them all the best.

Yours aye.,

A handwritten signature in black ink, appearing to read 'John Mayer', with a long, sweeping flourish extending to the right.

John Mayer, Advocate.
